

IRRIGATION RECOMMENDATION AND

CONSUMPTIVE USE CURVE FOR

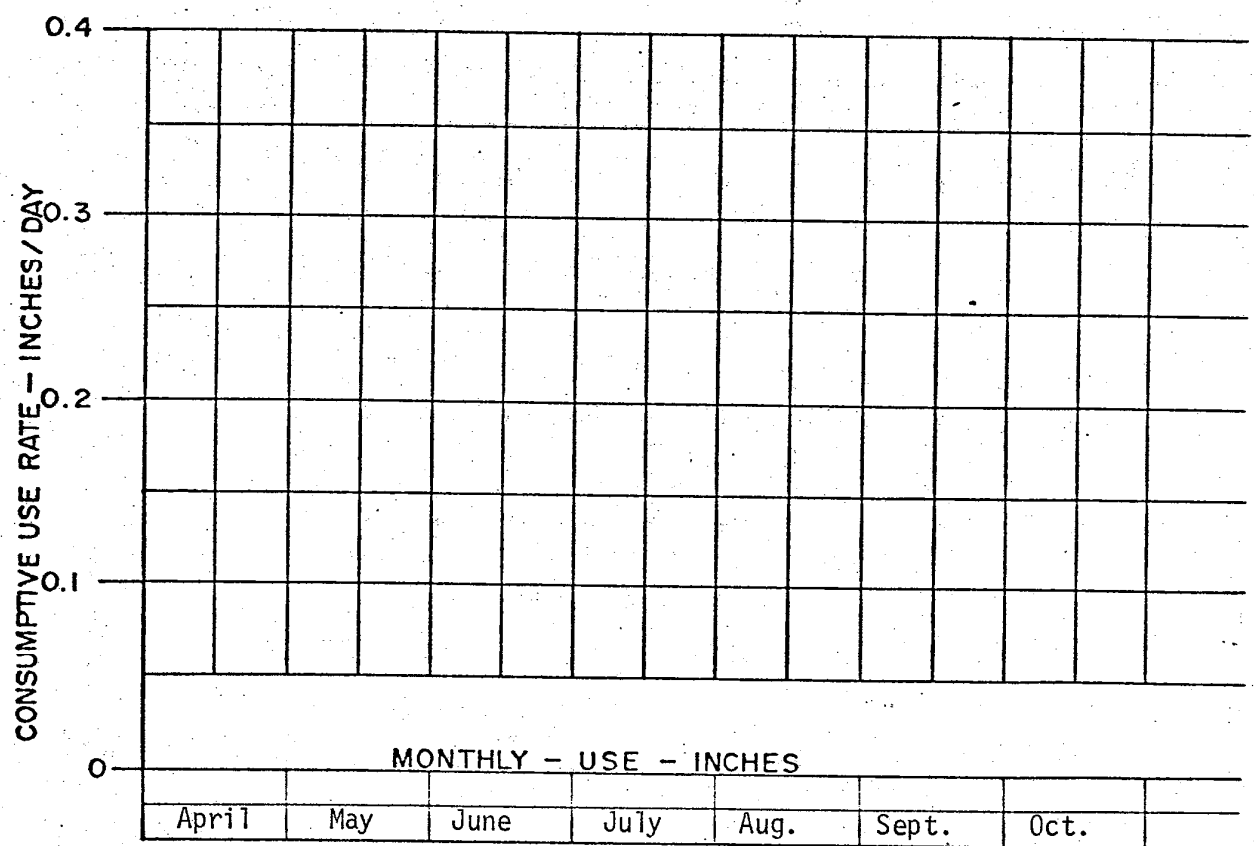

Cotton  
(CROP)

WHEN TO IRRIGATE

1. Up to first bloom, irrigate when 20-30% of available moisture remains in top 2 feet of root zone.
2. From first bloom to late boll maturing, irrigate when 50-60% of available moisture remains in top 2 feet of root zone.
3. In late boll maturing, irrigate when 50% of total available moisture remains in entire root zone.
4. Critical stages of growth at which sufficient moisture is needed are:

First bloom stage

Peak bloom stage
